"Inclusions others have as extra, we have standard"

Look at what sets us apart...

Cambridge 2 angle with kitchen, patented tackbox and more

Masquerade with drawbar tackbox, get the gear out of the car!

Calypso antiscramble custom designed for Vicky Mac

Our own horse as test dummies in an Antiscramble

- **World first fully adjustable chestbar system, patented.** Reduces the bay length and height, the first seat belt for horses in all our angles. We stand our angles up the camber of the road..... why copy the USA, we are on the opposite side of the road!! A Writco angle will fit a 16.3hh as standard and still have room to lower heads and travel in comfort.
- **New swingout tack box,** patented, swings out & locks outside the float when the tailboard is up!!! Have more room to sleep or shower without a cumbersome tackbox in the way, brought to you by the innovators, not the imitators!!
- **15 position** fully adjustable height and bay length an option in any straight load float, patented
- **Anti scramble** range of floats with width, safety and reliability in all areas of our design
- **Drawbar, tackbox** the first to bring you a large model with lockable side door, and waterproof fibreglass roof, practical enough to fit up to 2 big saddles
- **Fully hot dipped** galvanised tailboards on all our floats meaning absolutely no paint wear on this high traffic area and nonslip treads under the rubber on all models
- **LED lights** on all deluxe models, tail light numbers and clearance
- **4 wheel brakes** & breakaway unit on all our models, including ALL angleloads and antiscrambles (exc. the basic Enigma straightload)
- **Rug racks** have doors and are not just a folded piece of fence panel or mesh
- **Walk through, drop down** 2 pos chestbars in all deluxe models.
- **Load sharing suspension** (demonstrated at right) the only truly safe suspension for livestock.
- **Tow hitch chain** legally certified/stamped safety chain. These are required on all floats but are lacking on most! We use 2 on every float!!
- **Mag wheels** and light truck tyres on all floats
- **Rust proofing** for our customers peace of mind, to safeguard their investment for longer
- **Trade Marked** name, logo, 3 products patented, our own roof moulds, all which clearly illustrates our commitment & dedication to continue to build the very best in design, safety & innovation & not just produce a float to create a job.

True load sharing suspension showing wheel travel, therefore the very best ride in a float.

Non-load sharing suspension with no wheel travel and similar ride to a box trailer.
